

## Explanation of Games

**Low Net:** Subtract dots (handicap) off gross score

**Low Gross:** No handicap subtracted

**1 Best Ball of the cart:** Play regular game. Take one best score at each hole for each cart. (Net or Gross)

**2 Best Balls of foursome:** Play regular game. Take two best score of group at each hole for team score (Net or Gross)

**Bermuda Trifecta:** First 3 holes are played as a scramble, next 3 holes are played as best ball and last 3 holes are played as alternate shot.

**Cha Cha Cha:** 1 Best Ball (Net) on holes 10-13 & 16,  
2 Best Ball (Net) on holes 11-14 & 17  
3 Best Ball (Net) on holes 12, 15 & 18

**Roll The Dice:** Assign each person a number: 1, 2, 3, or 4 before the start of the game. Each person plays every hole with gross and net scores recorded on the score card. At the next tee box, roll the dice. If numbers 1, 2, 3 or 4 are rolled, take that player's net score from the previous hole and record it at the bottom of the sheet. If number 5 is rolled, take the best score; if number 6 is rolled, take the worst score. *Note: only record one net score per hole at the bottom of the score card, based on the roll of the dice.*

**Scramble: All players hit a drive. Go to best lie (not necessarily the longest hit).** Everyone hits from there until you're on the green. If the first putter gets ball in the hole, the rest of the players don't need to putt. If no player gets their putt in, you need to go to closest putt to finish the hole. Add the handicap of all four players and divide by 4. Subtract that total from the score. (If only 3 players are in group, 1 player hits twice).

**Three Little Pigs:** Each players' worst 3 holes (most strokes over par) are replaced with pars for those holes. Each players' putts are added to their score to become the final score.

**T-E-S-T:** On holes starting with a T, E, S, or T (all holes except 14 & 15), only the score of the player with the lowest gross score is counted.

**Three Blind Mice:** After all play is finished and all score cards are in, the pros will blindly pick 3 numbers, each number representing a hole played (1-9 for the front 9 or 10-18 on the back 9). The scores for the holes selected are subtracted from the total score for the team. This is done only after all score cards are submitted so the players do not know what holes will not count toward the final team score.<sup>8</sup>
